Work experience

- 01/20 – Amanacard (FinTech Startup) – Remote Contract: Serving as a Senior Fullstack .Net Developer – Solution Architect, entrusted with the development and maintenance of Amanacard websites and APIs, leveraging .Net and .Net Core MVC/Razor Pages alongside AWS and Blazor technologies. My responsibilities include implementing CI/CD pipelines using Azure DevOps, utilizing Visual Studio 2022 with Git for version control. I employ Entity Framework Core/EF Core PowerTools and MSSQL for efficient data management, while also integrating Lambda Functions and developing serverless applications. Proficient in Office Web Add-ins, Postman, Selenium, AWS QLDB, HTML, HTMX CSS, JavaScript, jQuery, Bootstrap, and adept in Service-Oriented Architecture and Microservices.
- 08/17 - 09/19 At SoftwareCentral a/s, Fullstack developer maintaining and developing their package distribution web client, which enhances the seamless mass distribution of software through networks via SCCM servers. This involves utilizing Asp.Net webforms, MSSQL, and Telerik controls to optimize functionality. Additionally, I am involved in the creation of a Smart Package Studio client using WPF and MVVM architecture. Furthermore, I am actively engaged in the development of the Smart Package Studio backend, leveraging Asp.Net MVC Core 2.1, Entity Framework Core, WCF services, and REST APIs for enhanced performance and scalability.
- 05/15 - 05/17 At NNIT a/s, I served as an IT Consultant and Web Developer for Statens Administration, overseeing the development and maintenance of their internal reimbursement system built on Asp.Net MVC4. Additionally, I contributed as a Developer for Civilstyrelsen, a substantial project catering to two clients. This endeavor involved the development of applications using WPF and WinForms, along with the creation of four websites utilizing Asp.Net,

and management of over ten web services. My role also included providing exemplary customer service and fostering effective communication. Furthermore, I provided IT consulting services for Danske Bank, offering strategic insights and solutions.

- 06/12 – 04/15 Addition a/s: Web developer. Maintaining, developing and servicing sites and internal clients for the Danish congress www.ft.dk and subsites based on Sitecore. Developing internal PDF parser. Front-end and back-end development in .Net, WPF, MVVM, ASP.NET, HTML, CSS, jQuery, JavaScript. Customer service and communication.
- 10/10 – 05/12 Mark-Information a/s: System developer: Front-end and back-end web development in Asp.Net, Html, Css, jQuery, JavaScript, Linq, webservice and MSSQL. Mobile development: jQuery mobile and MVC3. External communication for outsourced development in Romania.
Student job at Mark-Information a/s. Rewriting existing portal web parts to use Telerik rad controls instead of ASP.NET standard controls. Asp.Net, Html, Css, JavaScript. Asp.Net Mvc.
- 07/10 - 09/10 Internship at Dacoda a/s: Developing image import module for their custom CMS system based on Asp.Net Mvc. Html, Css, JavaScript.
